Describe the Number and Type of Contracts that the airport anticipates awarding:

Contracts Fiscal Year 2021

Market Area: Gold Beach Municipal Airport is located in the city of Gold Beach, Oregon in the south-west corner of the state and resides in Curry County.

A substantial majority of the airport's contractors and subcontractors come from the following counties: Benton, Coos, Curry, Deschutes, Douglas, Jackson, Josephine, Klamath, Lane, and Linn.

Step 1. Actual relative availability of DBEs

The base figure for the relative availability was calculated as follows:

In arriving at this goal, the Port has researched the U.S. Census Bureau, County Business Patterns Section, to obtain the total number of businesses in the designated market area surrounding the airport specific project site that fall within the appropriate North American Industry Classification Systems (NAICS) Code, which match the prevalent work to be accomplished under federal grant. The Port also consulted the DBE and Oregon Office of Minorities, Women, and Emerging Small Businesses (OMWESB) Certified Directory maintained by the State of Oregon to find the number of certified businesses in the job classifications for project work for the fiscal year. Individual DBE goals will be calculated for each Airport Improvement Program (AIP) and General Aviation Entitlement grant issued to the Port in FFY 2021, 2022, and 2023. The individual calculations include both a percentage goal and a dollar goal. The Port added each DBE goal and averaged that goal to calculate an overall DBE fiscal goal.

Method: Use DBE Directories <https://oregon4biz.diversitysoftware.com>

and Census Bureau Data from <https://www.census.gov/data/datasets.html>

The base goal projection after weighting is as follows:

- Total Weighted DBE Availability: \$57,604.64
- Total for All Trades: \$1,186,000.00

Dividing the weighted DBE totals by the total estimate for all trades gives a base DBE availability figure for the projects anticipated during the goal-setting period. This figure is expressed as a percentage and serves as the basis for the three-year overall goal.

Base of DBE Goal: **4.86%**

Step 2: Adjustments to Step 1 base figure

Not enough historical data on DBE participation is available to reference to make an adjustment to the Step 1 base figure; therefore, The Port is adopting the Step 1 base figure as the overall goal for this three-year goal period.

Breakout of Estimated “Race and Gender Neutral” (RN) and “Race and Gender Conscious” (RC) Participation.

The Port will meet the maximum feasible portion of the overall goal by using RN means of facilitating DBE participation.

1. Arranging solicitations, times for the presentation of bids, quantities, specifications, and delivery schedules in ways that facilitates DBE, and other small businesses, participation;
2. Carrying out information and communications programs on contracting procedures and specific contract opportunities;
3. Ensuring distribution of DBE directory, through print and electronic means, to the widest feasible universe of potential prime contractors;

The Port estimates that in meeting the established overall goal of 4.86%, it will obtain 4.86% from RN participation and 0% through RC measures.

Based on the 9th Circuit Court Decision in *Western States Paving Company v. Oregon State Department of Transportation*, the Port has determined that it is appropriate to use a race/gender neutral goal. The Port encourages all bidders to take active race/gender neutral steps to include DBE's in this and other airport contracts. Race/gender neutral steps include unbundling large contracts, subcontract work the prime contractor may self-perform, provide bonding or financing assistance, provide technical assistance, etc. This contract can be awarded without the lowest responsive bidder meeting the goal or demonstrating good faith effort to meet the goal.

The Port will adjust the estimated breakout of RN and RC DBE participation as needed to reflect actual DBE participation [see §26.51(f)] and track and report RN and RC participation separately. For reporting purposes, RN DBE participation includes, but is not necessarily limited to the following: DBE participation through a prime contract obtained through customary competitive procurement procedures; DBE participation through a subcontract on a prime contract that does not carry a DBE goal, DBE participation on a prime contract exceeding a contract goal, and DBE participation through a subcontract from a prime contractor that did not consider a firm's DBE status in making the award.
